

# Minimum requirement write-up

---

## Team11:

Lilin Wang (lw555), Yanjing Zhang (yz786)

## Accomplished feature:

Backend:

- Design and create your database, tables and their structures
- Write server script to operate on the database
- Write Server script to handle the "form" sent from mobile/client
- Use OpenTable API to extract restaurants info.
- Expose basic API for data export.
- UI Design

Android:

- Design and implement Log-in/Register Service on Android Device
- Use Camera to take photo and store to phone gallery
- Upload full image, thumbnail image, meal description and timestamp asynchronously to backend server
- Fetch metadata list and images, present them in customized list view
- Fetch restaurant data, present them in restaurant detailed view
- UI Design
